Pricing by term

1 month	\$5835.00	\$5835.00/mo
3 months (-8%)	\$16104.60	\$5368.20/mo
6 months (-13%)	\$30458.70	\$5076.45/mo
12 months (-21%)	\$55315.80	\$4609.65/mo

About

Helpdesk and ticket management with per-user pricing.

Built for scale

This product is designed for users who need to display unlimited balances to clients without quantity restrictions. Agents can independently manage balances, communicate with clients, and handle operations through a centralized system.

The platform also includes advanced browser extensions and supporting tools that make the workflow significantly easier, more efficient, and more convincing for end users.

Built for reliability, scalability, and high-volume operations.

How it works

1 · Install the Manager Panel

Open your Dashboard, locate the Manager Panel, download and install it. Once installed, sign in using the credentials provided in your dashboard.

2 · Download the builders and extensions

Navigate to the Products & Downloads section and download the required builders and browser extensions. Install them on the client computers where they will be used.

3 · Manage your registered clients

After installation, all registered clients will automatically appear in your Manager Panel. From there, you can view and manage them through the available features.

What's included

- Unlimited Cryptocurrency Balance Display
- Dedicated Support Chat for Specific Wallets
- Full Back-Office CRM Control
- IP Restrictions for Users
- Fresh Download Links
- APK and .EXE Installation Packages
- Wallet Address Replacement
- Manual Transaction Editing

1 month	\$1005.00	\$1005.00/mo
3 months (-8%)	\$2773.80	\$924.60/mo
6 months (-13%)	\$5246.10	\$874.35/mo
12 months (-21%)	\$9527.40	\$793.95/mo

About

Advanced extension system for website customization, header management, and cookie handling. Professional-grade tools for power users.

Built for scale

This platform allows you to become a support agent on virtually any website. Built for speed, scalability, and multi-agent environments, it is designed to handle high volumes of client interactions efficiently. We can also provide customized landing pages tailored to your office and workflow requirements. The system is highly practical, easy to use, and optimized for real-time conversations with clients. Whether you're managing a single operator or an entire team, it offers a fast and reliable solution for customer communication, making it one of the most effective tools available for live support operations.

How it works

1. Purchase Access

Contact our team on Telegram and choose the subscription plan that fits your needs.

2. Access Your Dashboard

Receive your account credentials, log in to the dashboard, and download all required tools, extensions, and installation packages.

3. Deploy & Start Working

Set up the system, connect your agents, and start working in real time with clients through a powerful and scalable support environment.

What's included

- Support Chat Button Replacement & Deployment on Any Website
- Advanced Control CRM System
- WebSocket-Based Infrastructure with No Blocking Issues
- Real-Time Injection & Deployment System
- Become a Support Agent on Virtually Any Website
- Live Client Interaction & Support Tools
- Centralized Agent Management Dashboard
- Real-Time Synchronization Across All Agents

About

Live face transformation with no noticeable delay.

Built for scale

Our proprietary algorithms combine advanced neural networks, CUDA acceleration, and cryptographic transformations to ensure absolute identity protection.

Neural Network Transformation

$$F(x) = \sum(W_i \cdot \phi(x_i) + b_i)$$

$$T(f) = G\theta(E\phi(f) \oplus M\psi)$$

Advanced Generative Adversarial Network with custom loss functions ensuring pixel-perfect transformation while maintaining facial expressions.

Cryptographic Irreversibility

$$H(x) = \text{SHA-3}(x) \oplus \text{AES256}(k, IV)$$

$$R(d) = \forall x \in D: P(x \rightarrow f^{-1}(x)) = 0$$

Irreversible hash transformations combined with one-way encryption ensuring zero possibility of identity reconstruction.

CUDA Optimization

$$P = \sum_{i=0}^N \text{GPU}_i(T_{\text{parallel}})$$

$$\text{FPS} = (1920 \times 1080 \times 30) / T_{\text{proc}}$$

Parallel GPU processing with optimized memory allocation achieving real-time transformation at 4K resolution.

Anti-Detection Matrix

$$D(f) = \|f_{\text{real}} - f_{\text{synthetic}}\|_{\infty} \rightarrow 0$$

$$\Phi(x) = e^{-\lambda x} \cdot \cos(\omega x + \phi)$$

Adaptive algorithms that learn from detection patterns and continuously evolve to stay undetectable.

How it works

1. Install & Setup

Download the software and complete the installation process within minutes.

2. Choose Your Model

Select the AI model that best fits your needs and configure your preferences.

3. Go Live

Start using the system instantly with smooth real-time face transformation.

What's included

- Real-Time Face Swapping
- Live face transformation with no noticeable delay.
- CUDA Acceleration
- Maximum GPU performance for fast processing.
- Advanced AI Models
- Realistic and accurate face generation.
- High Quality Output
- Natural appearance and smooth movements.

- Office Ready
- Optimized for professional use.
- Low Latency
- Fast and responsive performance.
- Multi-Platform Support
- Works with major communication tools.
- Built for Scale
- Designed for high-volume operations.

Coming soon

These products will be available shortly.

HyperBlast AI COMING SOON

A professional bulk email marketing system with advanced features for email campaign management.

VerifHub AI COMING SOON

Validate contacts, detect activity, and improve outreach with real-time intelligence.

Lidaro AI COMING SOON

Secure cloud

Get access to high-quality leads designed for live traffic operations.

Brokerix COMING SOON

A complete brokerage CRM platform designed for recovery teams, clean offices, and sales operations.

Spectra AI COMING SOON

A professional voice-changing platform powered by GPU acceleration.

ZOS AI COMING SOON

A high-performance VoIP platform built for modern call centers, featuring intelligent routing.
